

# **Badger Farm Road / Oliver's Battery Road South Road Junction**

The works programme and associated traffic management measures confirmed by HCC are as follows (see also PC website and Facebook page):

**The demolition of the wall outside No 80 OBRs and the replacement with close boarded fence: Works will start on 28 August and should take no more than 2 weeks**

**The relocation of the lamp column to the back of footway: Works will take place during the week commencing 10th September and should take no more than 2 days**

During these times, the footway outside No 80 will be blocked and barriers will be used to create an enlarged crossing place for pedestrians.

**The removal of the traffic island and footway resurfacing: Works will start on 17 September and will take 1 to 2 weeks**

For the footway resurfacing works, the footway will be closed again, and an area of carriageway will be barriered off to allow pedestrians to cross while the footway is out of use.

**Please note that the dedicated right turn lane into Oliver's Battery Road South will be blocked off for the duration of the works and that it may be necessary to use traffic lights for a few days (off-peak only).**
