

Proposed Banner Framework on The Battery near St Marks Hall

Background

At the PC Meeting on 4 July, it was resolved that Cllr Kirkby would discuss the feasibility and cost of increasing the banner framework near St Mark's and report back to a future Parish Council meeting.

Progress

I asked Peter Arnold, the person who had installed the original banner framework, if he was interested in installing another framework and subsequently met him at the site.

A location next to the existing framework, away from the road, was selected.

On 13 July, Peter confirmed the current cost to supply, build, paint and install a second framework of the same size as the original but without removable bars would be £350. However, Peter confirmed that the price may well change by September and will need to be reviewed at the time.

I request information on underground services using the LSBUD (line search before you dig) enquiry service (there were none in the vicinity when the original framework was installed). The responses were that there were still no services in the area proposed for the installation.

On 29 August, Peter has confirmed an updated price of £380.

Recommendation

The PC accept the price of £380 for doubling the size of the framework and the Clerk instructs the work.
