

## **Oliver's Battery Parish Council**

### All Inclusive Recreation Ground Improvement Project

Report for April 2024

1. Tree Watering As we move into spring, the tree watering programme gathers pace, David and Jackie Warren leading this initiative. Training has been given to groups of volunteers. The reporting of further progress in this initiative will come under the Handyperson Group's regular Reports, regularly brought to the PC by Cllr. Leigh Jones.
2. Re-marking the football pitch There is clear anecdotal evidence that the new-sized pitch is attracting regular use and that the area around the goals has worn. It was decided therefore to re-mark the pitch for the start of the Easter school holidays. It is necessary therefore to request retrospective permission for this expenditure, detailed below in the Proposal. Further re-marking opportunities will be identified during the year, as a pattern of wear is established.

### ***Proposal***

***It is proposed that retrospective permission be granted for the expenditure to re-mark the new football pitch in anticipation of the Easter school holidays. Cost to be in the region of approx. £50.***
