

Tree Warden report

I have checked today and can't see the need for any immediate work. The only area that I think needs cutting back is on OBRS as shown in the photo. My proposal is first I contact the immediate frontagers and if no issues. Arrange for the tree surgeon to visit and quote for the work to be done in the winter.

I did note some of the gates to the tennis court were left open and wondered if they might get damaged in a gale. Be better to have spring closures in my view.
