

## Olivers Battery Sustainability- December 2024

### FEEDBACK-

**Bike bus-** doing well in Oliver's Battery area, thanks to Anne Forder, Cycle Winchester, and other kind volunteers. There is a new, additional route from the bottom of Old Kennels Lane to Oliver's Battery Primary school.

**The SWISH event-** disappointing numbers despite being well promoted. Those who did attend were very positive. Thank you to the WI for their help and support.

**Thermal imaging survey's-** the team are planning to promote this provision and encourage more residents to take up the offer of a free survey this winter- to identify heat loss, no strings attached.

### PLANS

**Open homes-** potential opportunity for a couple of homes in Oliver's Battery which have been upgraded in some way to reduce their carbon footprint to be 'open' for interested residents/ viewings.

**Swap/Swish event in the Spring** (maybe coinciding the recycle day 18<sup>th</sup> March). Eve collaborating with Kate Fletcher, Brownies leader for this event- details to be confirmed.

**Mass Cycle ride-** with feeder ride from Olivers Battery- date TBC.

Sustainable OB agreed to advertise events via film night.
