

Sustainability Report for Oliver's Battery Parish Council

December meeting 2025

Home energy- article written for BF/ OB newsletter promoting 'My Homes Made Better'- a free service helping homeowners across Hampshire access tailored, free and impartial advice to make their homes cheaper to run.

Another article written for OB newsletter to promote thermal imaging surveys over the winter. Currently we have 3 households on the list to have a survey, waiting for colder temperatures before we can begin carrying survey's out.

Sustainable Travel- preliminary discussions held with Anne Forder (local resident, bike bus organiser and Cycle Winchester member) and Anna Heron (Sustainable Travel Officer with Winchester City Council) regarding possible signage in the area to promote safer cycling in the community.

Oliver's Battery Primary School bike buses now have 35 children cycling to school on a Friday (that's one sixth of the school!), this is a real achievement, but it is also highlighting the need for safer travel by bike in this area.

Reusing and Reducing- Eve to organise the next Big Outdoor Swap in the Spring, to include a trail map to make sure all participating households get visited.

Eve is looking into possible recycling projects for the OB community to engage with, watch this space!!
