REF: Traffic Order Proposals: A2142/KK

Oliver's Battery Parish Council has considered the draft order and makes the following comments:

Firstly, the council wishes to point out that para (i) (a) refers to Compton Lane incorrectly; this should read Compton Way.

That aside, the Parish Council fully supports the above Traffic Order Proposals.

Parking at the junction between Old Kennels Lane and Oliver's Battery Road South has long been a very real concern to residents and the Parish Council. When cars are parked as far as is permissible currently along Oliver's Battery Road South towards its junction with Old Kennels Lane, only one car width of road is available for traffic to proceed; delivery and other drivers may be unfamiliar with the area and that can cause problems. The Council is aware that there has been at least one accident as a result of the current parking situation, and aware too of a few close calls.

The addition of 'Limited Waiting 4 hours no Return is 2 hours 8am to 6pm Monday – Friday' is also welcome. It is worth noting that a small minority of drivers do not conform to the current parking arrangements. The Council trusts that provision for monitoring the limited waiting arrangements once implemented and parking in general will be made.

Therefore, the Parish Council wholeheartedly supports this Traffic Order Proposal and looks forward to this being implemented in the very near future.

Yours Sincerely,

James Patrick Sheehy
Parish Clerk

Oliver's Battery Parish Council
